Jorge Ferreira

I'm a developer who loves solving problems and cares about the whole development cycle, whether it's SPA and SSR projects, micro front-ends or legacy migrations. Deep experience with Vue.js for 7+ years and React for 5 and Node.js for 4 on the back-end, building the APIs and services that support the front-end. Belo Horizonte, Brazil.

EXPERIENCE

Mercado Eletrônico, São Paulo — *Senior Front-end Developer*

FEBRUARY 2025 — PRESENT

On the Home team, I own the platform service screens: dozens of routes built around data grids and tables, where the challenge is keeping many similar screens consistent and fast. I also help evolve the company Design System, shared by every product and serving a base of 15,000+ client companies. Architectural decisions from UX prototypes; code reviews and technical support for the team.

Technologies: Vue.js, JavaScript, Vite, Design System, ESLint, Rancher, Scrum, Kanban.

360 Suítes, São Paulo — *Senior Front-end Developer*

OCTOBER 2024 — JANUARY 2025

Worked directly on the back office and on the official site where the apartments are rented and booked, including the credit-card payment flow. Coordinated the development of the new apartment-management systems and trained the junior developers who joined the team.

Technologies: Vue.js, Node.js, JavaScript, Vite, Vitest, ESLint, Jest, Docker, AWS, Linux, Scrum, Kanban.

Stone (Vitta), São Paulo — *Front-end Developer*

NOVEMBER 2023 — OCTOBER 2024

At Stone (Vitta), I worked on the front-end of an online medical care system, including the live video-call components between doctor and patient, with occasional back-end work. Led the migration from Webpack to Vite and from Jest to Vitest, covered the application with unit tests and took part in interface decisions with the design team.

Technologies: Vue.js, Node.js, JavaScript, Vite, Vitest, ESLint, Jest, Docker, AWS, Linux, Scrum, Kanban.

BRQ Digital Solutions, São Paulo — *Front-end Developer*

NOVEMBER 2022 — NOVEMBER 2023

Consulting: assigned to two clients, working end to end across front-end, back-end and system integration.

Client: Grupo Petrópolis

Worked on the goods distribution system that schedules deliveries to bars and supermarkets. Front-end and back-end: fixes and new features on the interface, and new back-end services ensuring integration between systems.

Technologies: React, Node.js, NestJS, JavaScript, ESLint, Jest, Docker, Linux, Scrum, Kanban.

Client: Locaweb

Migration of the VPS, servers and DNS management panel: built the new front-end from scratch in Vue.js, from UX prototypes and the Locaweb Design System, with unit tests across the whole application.

Technologies: Vue.js, JavaScript, ESLint, Jest, Docker, AWS, Linux, Google Analytics.

Direcional Engenharia, Belo Horizonte — Intern → Front-end Developer

SEPTEMBER 2020 — NOVEMBER 2022

Front-end Developer

SEPTEMBER 2021 — NOVEMBER 2022

Looked after every internal site in the company, across front-ends and micro front-ends. Built from scratch the front-end of the construction-site tools and equipment inventory system, led the creation of the Single Sign-On (SSO) used by every system and helped the DevOps team integrate CI/CD.

Technologies: Vue.js, React, TypeScript, JavaScript, Sass, ESLint, Docker, AWS, Cognito, Scrum, Kanban.

Software Engineer Intern

SEPTEMBER 2020 — AUGUST 2021

Took part in every phase of the software development lifecycle, in an agile setting, solving issues across the company systems alongside the team.

Technologies: Vue.js, JavaScript, Scrum.

EDUCATION

Dom Helder Escola Superior — Belo Horizonte, MG — Bachelor's degree in Computer Science

2019 - 2022

LICENSES & CERTIFICATIONS

Alura — Vue.js 3 track

2022

Alura — Docker: creating and managing containers

2022

DIO — Inter Frontend Developer

2021 - 2022

Alura — TypeScript track

2022

Alura — SEO track

2023

IGTI — Full Stack Developer Bootcamp

2020

AWARDS

Honorable mention, 12th Brazilian Public Schools Mathematics Olympiad (OBMEP)

2016 • MEC

Qualified for the OBMEP second round in 4 editions (2013, 2015, 2016 and 2018)

2013-2018 • OBMEP

VOLUNTEERING

Movimento EcoDom

FEBRUARY 2019 — DECEMBER 2022

Socio-environmental movement working in defense of the environment since 2011, running cultural and educational activities with schools in Belo Horizonte and its metropolitan area.
